Internals vary based on rating

Overview:

The 630 Amp is our biggest EV supply pillar and is available in different configurations. These pillars cover 22kW supplies through to 120/150kW, with a differing number of connections on each solution.

Features:

- Accommodates up to 18 EV charge points
- Caters for charge point rating of 22kW (Fast) – 120/150kW (Ultra-Rapid)
- Once installed, modular distribution configuration aids easy upgrades to meet future demand requirements (subject to load balancing being installed on CP's)
- Anti-condensation heater as standard
- DNO space allocated
- PEN Fault Detection Technology used on PME Solutions
